

RF-S+ SF6 Refilling and Evacuation Device

Application:

Suitable for refilling sf6 gas from cylinder to chamber, Or as a teaching and research tool for institutions of colleges and universities learning and scientific research.

Main Features

- ◆ Vacuum pumping for small capacity switchgear
- ◆ Vacuum pumping of gas delivery pipes
- ◆ Vacuum digital display function
- ◆ Refilling SF6 gas from Cylinder to chamber
- ◆ Transportable cylinder moving
- ◆ Equipped with weighing device to display the weight of SF6 gas in cylinder in real time
- ◆ Intelligent control of heating temperature and time

Angel Cheng/Henan Relations Co., Ltd

Address: No.101 Yulan Street, National High-tech Industry Development Zone,Zhengzhou,450001 Henan, China

Email: angel.cheng@sf6relations.com Web:www.sf6relations.com

- ◆ Automatic vacuum stop
- ◆ Vacuum pump equipped with anti-return valve to prevent return of oil

Technical Data

Dimension: 620mm (L)*580mm (W)*1360mm (H)

Weight: 85kg

Power supply: 1phase, AC220V, 50Hz

Standard equipment

Vacuum pump: 17m³/h, <10Pa

Weighing system

Heating system

Phase-sequence indicator

Digital vacuum display

Pressure gauge

Pressure regulating valve

Fixed wheel

Power cable line: 10 meters

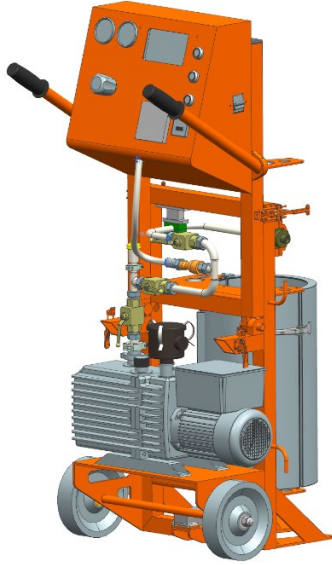

Connection tube: DN13 with self-sealing, 5 meters
